

## High/low pressure in Sand filter Pumps

Below you will find a checklist, please check it when the sand filter pump has a high or low pressure. The sand filter pump is not self-priming. It is therefore recommended to install the pump next to the pool below the water surface.

### Low/no pressure

- ✓ Both the inlet and outlet of the pool must be completely submerged
- ✓ There must be no blockages in front of the inlet and outlet
- ✓ The hoses and the pump must be free of air
- ✓ There should be no air bubbles in the pump
- ✓ Make sure the pump has been prepared following manual

### High pressure

- ✓ The filter medium must be clean
- ✓ Regularly perform a backwash and rinse according to the manual

## High/low pressure in Sand filter Pumps

---

If **other devices** are connected:

- ✓ Make sure the other products are completely free of air
- ✓ Keep the distance that the water has to travel as small as possible
- ✓ Everything must be set up below the water surface level
